

FOOTBALL PUTTING OR CHIPPING

First Tee has a huge variety of great skill based games they use regularly as part of their award winning program. They have provided us with video links that help explain each one.

While these games are mainly designed for use at golf courses in larger peer groups, they can easily be adapted for at home use with just minor adjustments. Enjoy!

SET UP:

Create a Football field grid (four zones) in your house or yard with some goal posts at the end using whatever you can find. Ask an adult for help but consider cones, chalk, tape, rope, string or skipping ropes for the ground grid. Think about pool noodles, sticks or whatever you can for goal posts. Remember if you're putting the grid should be flat, if chipping it's ok to have higher edges. Make sure you have a putter or a wedge to chip with and some balls. If putting inside consider using balls that are soft!

FOOTBALL PUTTING OR CHIPPING

GAME:

- You get 4 downs, or chances, to putt or chip from a start point, into each football zone.
- Starting with the closest zone attempt to leave your ball inside the zone. If successful, you've got a first down and move onto the next zone with four new downs.
- If you make it to the final zone and score – that's a TOUCHDOWN and 6 points!
- Now decide if you are going to try the extra point or 2-point conversion.
- Extra point: Putt, or chip, between the posts.
- 2-point conversion: One chance from start point to get ball into the goal area.
